

**We are hiring!**

## Junior Consultant SAP-Technologies (all genders)

### #challengecheck

- Learn how to increase digitalization for intelligent enterprises using state of the art technologies, frameworks and programming languages in an ever-changing cloud environment.
- Develop hybrid solutions, connecting on premise systems with cloud systems, leveraging CI/CD principles.
- In your first year you will learn the technical foundation that will enable you exploring new solutions, in order to further improve our customer's business processes.
- We encourage you to be curious, observe, make mistakes, practice and learn.
- As part of our junior program, you will be accompanied by experienced mentors and little by little you will be given small tasks that you can solve on your own.

### #skillcheck

- Successful university degree in computer science or a related field
- Practical Experience in at least one of these fields
  - Object oriented programming (e.g. Java, C#)
  - Relational databases (e.g. MySQL)
  - Web Technologies (e.g. JavaScript, XML, WebServices)
  - Modern Technologies (e.g. IoT, Machine Learning, Blockchain, Kubernetes)
- English at C-level according to CEFR
- Ability to work in a team, commitment, curiosity and initiative
