

Setup CUA

MORE CONVENIENCE IN USER ADMINISTRATION

A central user administration provides greater convenience in user management and in the roll-out of user and role profiles in different SAP® systems, and increases their safety.

The consolut Setup CUA gives administrators of central systems an overview of, and access to, all user data in the entire system landscape.

The setup of the SAP® standard module "Central User Administration" is part of the consolut Compliance Suite and facilitates the use of additional compliance tools. With the consolut Setup CUA, users can enjoy the full benefits of the Compliance Suite.

In order to optimally configure the tool, consolut draws on a wealth of experience from customer projects and implementations.

EXPERIENCE MAKES ALL THE DIFFERENCE

The consolut Setup CUA uses a central and secure client to perform and manage the customizing of users and roles in different systems. Only a limited, defined number of people have access to this client. Once they have been

configured, the roles and users can be distributed to any number of systems and clients. In this way, administrators can control the exchange of data and ensure its consistency.

The central client is ready for use in a minimum of time. The direction of distribution is taken into account as well as the questions of where and by whom a system is administrated.

Once implemented, the consolut Setup CUA delivers long-term benefits through easier management of the Compliance Suite.

YOUR BENEFITS

- ▶ Administration of SAP® users in a central client
- ▶ Distribution of user settings via RFC connection to all connected systems and clients
- ▶ Fewer manual administration tasks
- ▶ No licensing fees
- ▶ Individual, flexible configuration
- ▶ Extendable

PRODUCT SHEET

CONSOLUT SETUP CUA

OUR SERVICES RELATING TO THE COMPLIANCE SUITE
