

# Setup SSO

## SAP® USERS WITHOUT PASSWORD PROBLEMS

---

Are you using several SAP® systems? Do you change your passwords regularly? Do you need a lot of support in password administration? Your users are tired of constantly assigning new and different passwords for the various systems?

## OUR SOLUTION: THE CONSOLUT SETUP SSO

---

Direct access to all SAP® systems with a single login!

## OUR SKILLS

---

consolut has extensive experience with the consolut Setup SSO: We have already implemented the solution successfully for many customers, and we use it in our own SAP® systems.

## YOUR BENEFITS

---

- ▶ No password chaos, especially if several SAP® systems are used and passwords are changed regularly
- ▶ Less administration work for your SAP® support team
- ▶ Satisfied users that can log onto the SAP® system without problems and work more efficiently

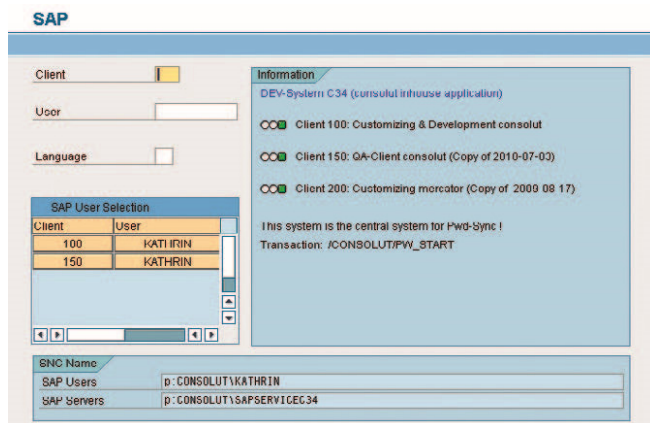

# PRODUCT SHEET

## CONSOLUT SETUP SSO

### FUNCTIONALITY OF THE CONSOLUT SETUP SSO

The login procedure for SAP® systems is based on the Kerberos authentication protocol in the Windows domain. Once the user has logged in, this authentication is automatically applied to the SAP® systems as well.

With the consolut Setup SSO, users no longer need a separate SAP® password. They must, however, first authenticate themselves successfully to the Windows domain.

### OPTIONS

- ▶ Parallel assignment of SAP® passwords, especially for SAP®-CCC staff
- ▶ Fingerprint authentication

### OUR SERVICES

We will analyze your Windows ADS domain environments with you to find out where a Kerberos SAP® certification makes sense.

We will then use Kerberos to integrate all SAP® servers as "computers" into the selected domain if they are not integrated already. Next, the SAP® logon entries are adapted so that every user receives an entry for logon with a password and an entry for logon with the SSO. Finally, we will configure the SSO in a sample system and test it in this system with some of your users.

**See for yourself and decide if you want to introduce the consolut single-sign-on in your production system.**

We will be happy to show you how you can change your entire system to SSO.

We offer the following options for the implementation of the consolut Setup SSO:

- ▶ We implement the solution for you
- ▶ We implement the solution in your system together with your staff
- ▶ We train your staff to implement the consolut Setup SSO on their own
